

SCHOOL MANAGEMENT SYSTEM

Prologue

Tjipta ID is a company created in South Tangerang in 2025, started by their first product which called PEDE created for School Management System purposes.

The idea comes after the founder of Tjipta have a call from headmaster of SMK Islamiyah Ciputat. The headmaster has facing the issue in his management sector for students and teachers.

The first issue is there is no digital system for student to saving their money. So, the founder of Tjipta create the digital saving system for students called Bank Mini.

Now the students can see their balance data and doing debit and credit transactions. The headmaster also can see the recapitulation as a report. So, there is no missed data again.

Then the other requirement came after that. Such as creating Computer Based Test features, Attendance Record features, etc.

Technology Stack & Infrastructure

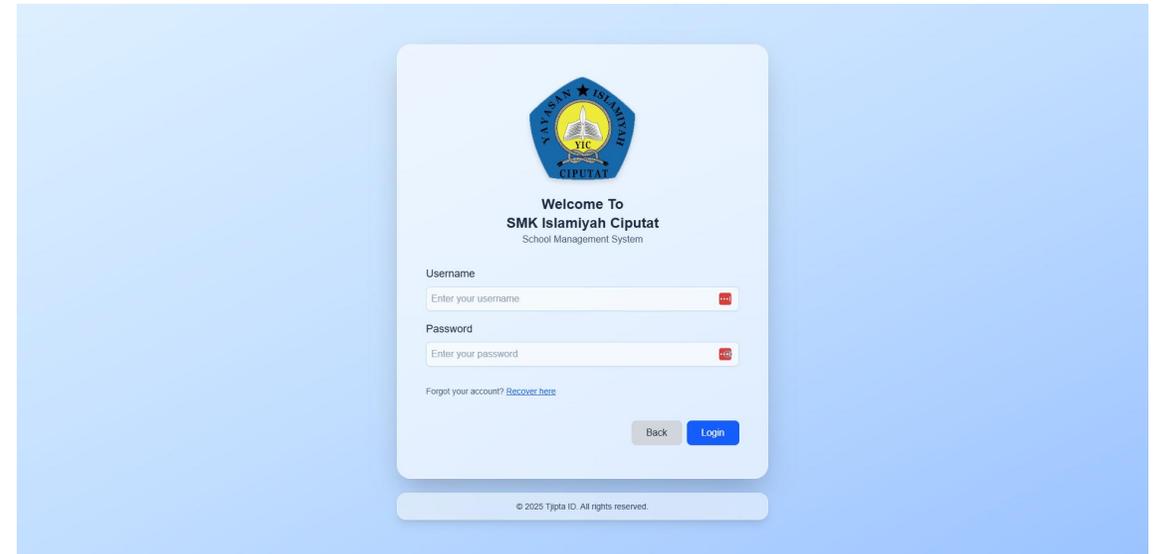

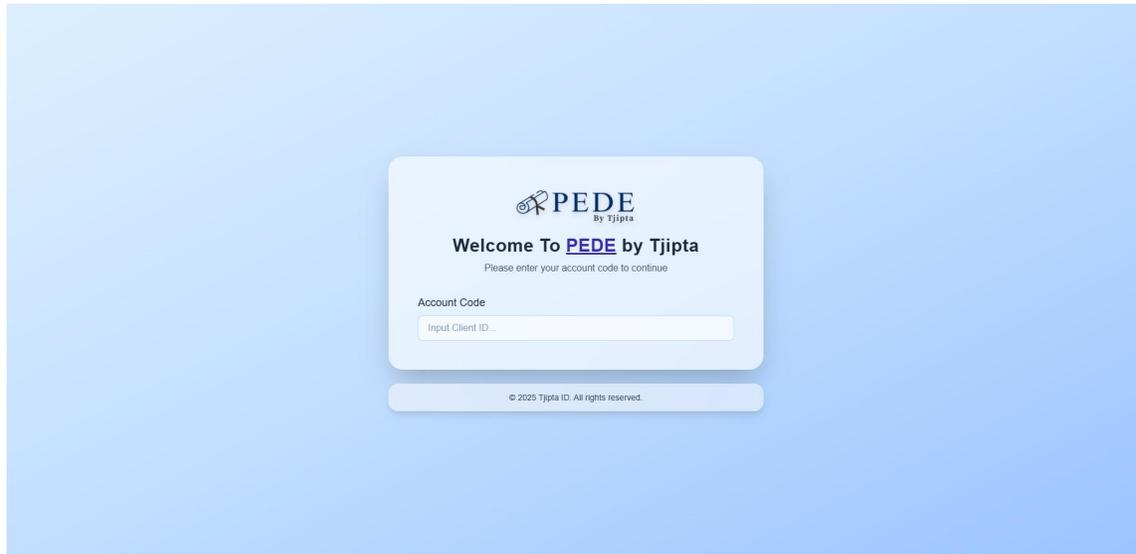

As of current modern technology, we also use the latest of best stack to create the fast, lightweight, modern, scalable, and responsive application.

The stack consist of Go Lang as Back End programming language and Vue JS as Front End framework.

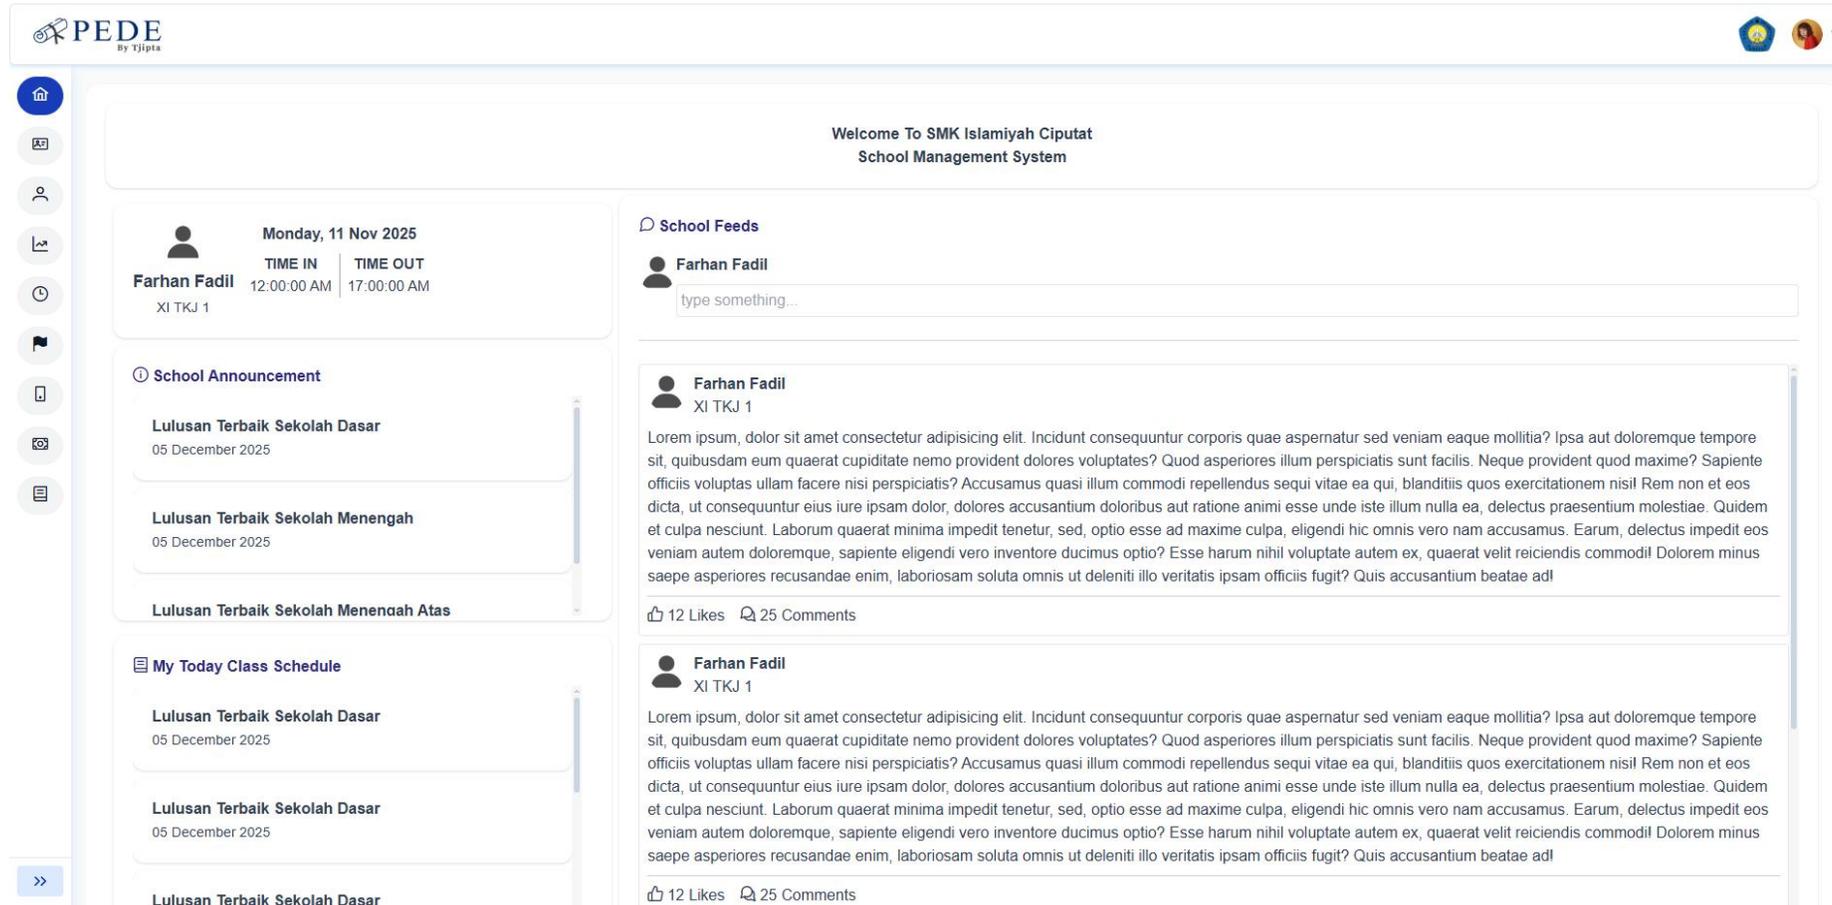

Our infrastructure is cloud based so you don't have to prepare the server, we will prepare everything setup for you.

Also for deployment we use the modern deployment technology, so you don't have to worries about server down or slowness traffic.

Home Preview

The screenshot displays the home interface of the PEDE School Management System. At the top, the PEDE logo and user profile icons are visible. The main content area is divided into several sections:

- Welcome Message:** "Welcome To SMK Islamiyah Ciputat School Management System"
- User Profile:** Farhan Fadil, XI TKJ 1, with a calendar icon for Monday, 11 Nov 2025. A table shows his attendance: TIME IN 12:00:00 AM and TIME OUT 17:00:00 AM.
- School Feeds:** A section for user posts. The first post is by Farhan Fadil (XI TKJ 1) with a text input field. The second post is a longer text post by Farhan Fadil (XI TKJ 1) with 12 Likes and 25 Comments.
- School Announcement:** A list of announcements, including "Lulusan Terbaik Sekolah Dasar" (05 December 2025), "Lulusan Terbaik Sekolah Menengah" (05 December 2025), and "Lulusan Terbaik Sekolah Menengah Atas".
- My Today Class Schedule:** A list of class schedules, including "Lulusan Terbaik Sekolah Dasar" (05 December 2025), "Lulusan Terbaik Sekolah Dasar" (05 December 2025), and "Lulusan Terbaik Sekolah Dasar".

A vertical sidebar on the left contains navigation icons for Home, Profile, Calendar, Messages, Notifications, and other functions.

Key Features

1. CBT (Computer Based Test)

This menu is our core application that can be used for student exam via their mobile phone. Which reduces the use of paper.

2. Students

This menu is storing student detail information, alumnus tracking, give student disciplinary, student class schedule, etc.

3. Teachers

This menu is storing teacher detail information, teacher payslip, teaching schedule, and performance.

4. Attendance

This menu used for recording teachers and students attendance based on location and face recognition, also for teachers or students which want to request leave for sick, family purpose, etc.

5. Bank Mini

This menu is our core application that can be used for students to save their money. Students also can see their balance via application

6. School Activity

This menu is used for give announcement to students / teachers, teacher activity recording, and extracurricular.

7. E-Learning

This menu is used for creating learning via the application. Teachers can record video, create a quiz, and create task submission.

8. Rapor

This menu is used for maintain and print out the students study result recapitulation based on school standard rules.

1. CBT (Computer Based Test)

This modules is consist of :

- A. Question Library
- B. Exam Management
- C. Exam Period
- D. Exam Monitoring
- E. Student Exam
- F. CBT Report

CBT Cycles

For creating the CBT in PEDE you have to follow the cycles below :

1. Create a question via Question Library menu
2. Create a period for exam via Exam Period menu
3. Create an exam & assign the participants via Exam Management menu
4. Generate the token for students via Exam Period menu

After the exam created students can access their exam via Student Exam menu.

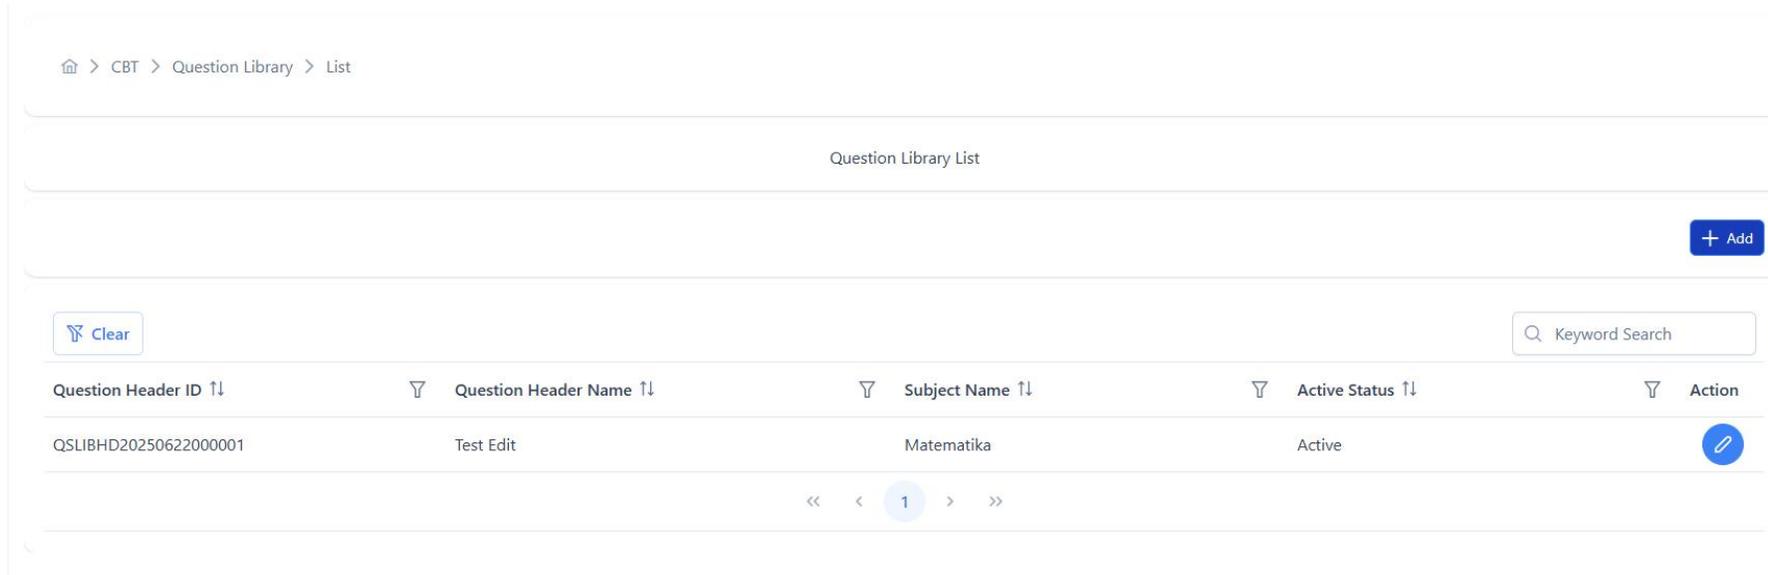

While the exam is running teacher can monitoring the students which filling the exam via Exam Monitoring menu.

CBT Rules

1. Students which have no token cannot participate the exam.
2. Exam only available to take if the time and date is within the exam date and session time.
3. While the exam is running the screen will be full and students are not allowed to get outside that fullscreen. If it happens then the exam will be mark as completed without the student completed manually.
4. When the students is running out of the time then the exam will be mark as completed automatically.

1. CBT (Computer Based Test)

A. Question Library

The screenshot shows a web interface for managing a question library. At the top, there is a breadcrumb trail: [Home](#) > [CBT](#) > [Question Library](#) > [List](#). Below this is a title bar for "Question Library List" and a blue "+ Add" button. A "Clear" button is on the left, and a "Keyword Search" input field is on the right. The main content is a table with the following columns: "Question Header ID", "Question Header Name", "Subject Name", "Active Status", and "Action". A single row is visible with the ID "QSLIBHD20250622000001", name "Test Edit", subject "Matematika", and status "Active". The "Action" column contains a blue edit icon. At the bottom, there is a pagination control showing "1" in a circle, with arrows for navigation.

Question Header ID ↑↓	Question Header Name ↑↓	Subject Name ↑↓	Active Status ↑↓	Action
QSLIBHD20250622000001	Test Edit	Matematika	Active	

This menu is used for creating the question library.

The question library can be used in exam multiple times, not limited. So if in the future there will be the exam which is the same you can use the inputted question library.
